Period for Reply					
A SHORTENED STATUTORY PERIOD F WHICHEVER IS LONGER, FROM THE M - Extensions of time may be available under the provisions after SIX (6) MONTHS from the mailing date of this comm - If NO period for reply is specified above, the maximum st - Failure to reply within the set or extended period for reply Any reply received by the Office later than three months earned patent term adjustment. See 37 CFR 1.704(b).	IAILING DATE OF THIS COMMUNION of 37 CFR 1.136(a). In no event, however, may a repulsion nunication. atutory period will apply and will expire SIX (6) MON will, by statute, cause the application to become AE	CATION. reply be timely filed ITHS from the mailing date of this communication. BANDONED (35 U.S.C. § 133).			
Status					
1) Responsive to communication(s) file	ed on .				
·— ·	2b)⊠ This action is non-final.				
3) Since this application is in condition					
closed in accordance with the practi	ce under <i>Ex parte Quayle</i> , 1935 C.D	ı. 11, 453 O.G. 213.			
Disposition of Claims					
4) Claim(s) 1-86 is/are pending in the a	application.				
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6) Claim(s) is/are rejected.					
7) Claim(s) is/are objected to.					
8)⊠ Claim(s) <u>1-86</u> are subject to restricti	on and/or election requirement.				
Application Papers					
9)☐ The specification is objected to by th	e Examiner.				
10) The drawing(s) filed on is/are	a) accepted or b) objected to	by the Examiner.			
Applicant may not request that any obje	ction to the drawing(s) be held in abeyar	nce. See 37 CFR 1.85(a).			
	the correction is required if the drawing				
11)☐ The oath or declaration is objected to	by the Examiner. Note the attached	d Office Action or form PTO-152.			
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim a) All b) Some * c) None of:	for foreign priority under 35 U.S.C. §	; 119(a)-(d) or (f).			
1. Certified copies of the priority	1. Certified copies of the priority documents have been received.				
2. Certified copies of the priority	documents have been received in A	pplication No			
	of the priority documents have been	received in this National Stage			
	onal Bureau (PCT Rule 17.2(a)).				
* See the attached detailed Office action	n for a list of the certified copies not	received.			
Attachment(s)

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-4, drawn to an aldehyde compound, classified in class 528, subclass 129.
- II. Claim 5, drawn to dialdehyde compound, classified in class 528, subclass245.
- III. Claim 6, drawn to an aldehyde compound of formula III, classified in class 528, subclass 129.
- IV. Claim 7, drawn to an aldehyde compound of formula IV, classified in class 528, subclass 129.
- V. Claim 8, drawn to an aldehyde compound of formula V, classified in class528, subclass 129.
- VI. Claim 9, drawn to an aldehyde compound of formula VI, classified in class 528, subclass 129.
- VII. Claims 10-37, drawn to an aldehyde compound of formula II, classified in class 528, subclass 129.
- VIII. Claims 38-45, drawn to a dialdehyde compound of formula VIII, classified in class 528, subclass 245.
- IX. Claims 46-49, drawn to a polyethylene containing compound of formulaIX, classified in class 528, subclass 425.

Application/Control Number: 10/623,978

Art Unit: 1711

X. Claims 50-57, drawn to an aldehyde compound, classified in class 528, subclass 129.

Page 3

- XI. Claims 58-61 and 66-69, drawn to a polyethylene containing compound of formula X, classified in class 528, subclass 425.
- XII. Claims 62-65, drawn to an aldehyde compound, classified in class 528, subclass 129.
- XIII. Claims 70-77, drawn to a polyethylene containing compound of formula XI, classified in class 528, subclass 425.
- XIV. Claim 78, drawn to a method of making a polyethylene glycol aldehyde of formula I, classified in class 528, subclass 499.
- XV. Claims 79-82, drawn to a method of making a polyethylene glycol aldehyde of formula II, classified in class 528, subclass 499.
- xvi. Claims 83-86, drawn to a method of making a polyethylene glycol aldehyde of formula VIII, classified in class 528, subclass 499.

The inventions are distinct, each from the other because of the following reasons:

Inventions XIV and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product such as the ones having formula II-VII.

Art Unit: 1711

Inventions VII and XV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product such as the ones having formulae III-VII.

Inventions **XVI* and VIII are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product such as the one having formula in group II.

Inventions (I-VI) and (VIII or IX or X) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are based on different reactants to form different products.

Inventions (I-VI) and XI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are based on different reactants to form different products..

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

Art Unit: 1711

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
